

		Weightage	Poor (0 to 4)	Approaching Expectation (4.5 to 5.5)	Satisfactory (6 to 7)	Good (7.5 to 8.5)	Excellent (9 or 10)
Handover Documentation		30%	Report is poorly organized. Difficult to read and understand. Covers too few areas with vague descriptions.	Most parts of the report are poorly organized, requiring extra effort to read for understanding. Covers too few areas with some vague descriptions.	Information presented in a clear and logical order in most parts of the report, with most of the essential deliverables presented. Report covers some of the required areas with clear descriptions for most sections.	Information presented in a clear and logical order in most parts of the report, with most of the essential deliverables presented. Paragraphs and transitions support readability and comprehension. Report covers most of the required areas with clear descriptions for most sections.	Information presented in a clear and logical order in most parts of the report, with all essential deliverables presented. Paragraphs and transitions enhance readability and comprehension. Report covers all the required areas with clear descriptions for all sections.
Test Plan		25%	Most of the test cases were irrelevant in the context of the requirements. No plans for alternative test steps. A lot of missing instructions in between the test procedures.	Most of the test cases were irrelevant in the context of the requirements. Little plans for alternative test steps. Some instructions were missing in between test steps.	Some of the test cases were irrelevant in the context of the requirements. Some of the alternative test steps were planned. Some instructions were missing in between test steps.	Good attempts can be seen in thinking through the test cases. Most of the alternative test steps were well thought of. Instructions were well written.	Test cases were well thought through. Most of the alternative test steps were well thought through. Instructions were well written.
Software Requirements Specifications (SRS)	Quality	15%	The SRS is completely unclear, disorganized, and difficult to understand. Requirements are stated in a vague, ambiguous, or contradictory manner. It is incomplete, missing most aspects of the software system.	The SRS is unclear, poorly organized, or difficult to understand. Many requirements are stated in an ambiguous or contradictory manner. It is incomplete, missing important aspects of the software system.	The SRS is moderately clear and well-organized, with some ambiguities or inconsistencies. Some requirements are stated in a precise and unambiguous manner, while others may be unclear or contradictory. It is mostly comprehensive, covering most aspects of the software system, but may be missing some important details.	The SRS is generally clear and well-organized, with some minor ambiguities or inconsistencies. Most requirements are stated in a precise and unambiguous manner, and it is comprehensive, covering most aspects of the software system.	The SRS is exceptionally clear, concise, and well-organized, with all requirements stated in a precise and unambiguous manner, avoiding any ambiguity or contradictions. It is comprehensive, covering all aspects of the software system, including functional, and non-functional requirements.
	Modelling (Use case diagram/BPMN)	10%	Shows minimum effort to design model(s).		Minor mistakes in the model(s) when designing the elements used in the project.		Most of the elements in the project are accounted for in the model(s).
Company Assessment							
User Manual		20%	Little to no relevant information in the user manual.	Most of the information were not documented in the user manual. Most instructions were not clear.	Some of the information were not documented in the user manual. Some instructions were not clear.	Most of the essential information were documented in the user manual. Instructions were clear.	Essential information were documented in the user manual. Instructions were clear.
